

## LCCI Annual Qualification Reviews and Sample Questions available from October 2008

---

From October 2008 centres will be able to download Annual Qualification Reviews for the most popular LCCI International Qualifications. The Annual Qualification Reviews provide support and guidance to centres, helping teachers to prepare their candidates for taking the examinations. The reviews include the following features:

- generic feedback on candidate performance demonstrated in examinations over the preceding 12 months
- global pass rates enabling centres to compare their candidates' performance with that of candidates throughout the world
- candidate strengths and weaknesses by syllabus topic area
- annotated exemplar material identifying good and poor performance
- sample questions and answers
- any changes to the syllabus or question types and the implications of these changes

We are currently reviewing the policy for the publications of past papers and model answers; centres will be informed of any changes to current practice, and in the meantime those already on the LCCI website will remain and therefore will still be available for centres to download.

Please note that sample questions and answers will not be provided in the Annual Qualification Reviews for LCCI's suite of financial qualifications; past papers and model answers will continue to be published for these.
